My only thought is that we know frequent saving is required for MAX to acknowledge you are actively editing. Perhaps MAX kicked you off without you realizing it because you hadn't saved the document recently? Laurel advised me to save at least every 10 minutes.

My footnote text on our original proposal didn't make it in. I'll add it later.

So how did Lea check the doc out before I was done editing?

Subject: WY RH Intro Section

I just finished adding my edits and comments to the Intro section thru MAX. I hope they all got in. It looks like Lea is editing the file right now.
